

Introduction

My name is Markus, I am 25 and I am in my third semester at KEA studying Multimedia Design. I am originally from Norway, but I have lived in Copenhagen for two years now. I am passionate about web design, from designing to coding, I enjoy doing it all. I have acquired different knowledge through previously studying photography and art, which is useful for designing. With the projects I have worked on I have been involved with designing, testing and implementing designs for web. I also work as a graphic designer for a music collective here in Copenhagen as a hobby. I am not afraid of sharing my opinion, and in return getting feedback and criticism about my work.

For me a student job is important, since it will strengthen my knowledge and teach me even more than my school will. In February I will have an internship elective for 10 weeks, which would be a perfect opportunity to work in depth with a project and further develop my skills.

CV

Markus Nikolai Jørgensen

Education

KEA

Academy Profession Degree
Multimedia design
August 2019 - Juni 2021
Copenhagen, Denmark
